

## **ABSTRACT OF THE DISCLOSURE**

5           Converting document formatted for use on servers to and from documents  
formatted for use on small devices, including synchronizing two or more versions of the  
document. A user may edit documents formatted for use on small devices and the  
documents may be synchronized with documents on the server to keep the documents up  
to date. In one embodiment, an n-way merge process may restore document formatting,  
10       styles and/or data features that may have been lost from one or more documents when  
converting from an office format to a small device format. In one embodiment, the server  
may provide an office productivity environment, and the documents on the server may be  
office documents.
